Education

- **Vellore Institute of Technology Bhopal** — Bhopal, India
  Bachelor of Technology – Computer Science & Engineering; CGPA: 8.28 — *2021 – 2025*

Skills Summary

- **Languages**: Python, SQL, C++
- **Data Engineering**: ETL, Data Integration, Data Migration, Data Validation, Data Quality, AWS S3
- **Databases**: PostgreSQL, MariaDB, MongoDB, Database Schema Design, Query Optimization
- **Business Intelligence**: Power BI, DAX, Business Analysis, KPI Dashboarding, Plotly
- **APIs & Automation**: REST APIs, API Integration, Webhooks, FastAPI, OAuth 2.0, Google Workspace APIs, SMTP
- **Cloud & Tools**: Google Cloud Run, Google Cloud Secret Manager, Git, Pandas, NumPy, Jupyter Notebook, MS Excel

Experience

- **Infinity Tech Global Solutions** — India
  AI Data Analyst / Business Analyst — *Oct 2025 – Present*

- **LETZRYD – Vehicle & Partner Operations Platform**
  - Architected a multi-tier **relational database schema** for fleet and partner operations, ensuring **referential integrity** across drivers, partners, and financial data.
  - Engineered scalable **PostgreSQL** data structures supporting real-time onboarding, fleet tracking, and dynamic financial adjustments while maintaining data consistency.
  - Led **database schema optimization and migration** across environments, improving query performance and maintaining cross-environment data consistency.
  - Developed a production **REST API and webhook integration** with Rapido to ingest real-time Captain and Order Status events into **PostgreSQL**, enabling automated synchronization of fleet and trip lifecycle data.
  - Implemented **FastAPI**-based **API authentication and payload validation**, including API-key authentication, status validation, and structured webhook processing for reliable third-party data ingestion.
  - Designed **PostgreSQL UPSERT** workflows to maintain incremental order updates while preserving trip fare, reason, captain earnings, and other financial attributes across the order lifecycle.
  - Deployed and validated the integration on **Google Cloud Run**, using **Google Cloud Secret Manager** for secure API-key and database credential management.
- **TONA – Marketing & Campaign Analytics**
  - Built end-to-end **ETL workflows** to extract, transform, and prepare large-scale marketing campaign data from **AWS S3** into analysis-ready datasets, reducing report generation time from 2 days to same-day delivery.
  - Designed interactive **Power BI dashboards** translating campaign data into actionable **KPIs**, enabling leadership to monitor campaign performance and optimize marketing spend.
  - Consolidated fragmented data sources into an automated **BI pipeline**, reducing manual reporting effort and improving reporting consistency.
- **People Verse – AI-Powered Candidate Assessment**
  - Architected an automated candidate assessment pipeline using **LLMs** to generate structured MCQs, competency mappings, and subjective evaluations from job descriptions.
  - Integrated **Google Forms and Google Drive APIs** using **OAuth 2.0** to automate assessment generation and distribution, converting unstructured LLM outputs into structured Excel reports using **Pandas** and **OpenPyXL**.
  - Implemented **SMTP-based email automation** for assessment distribution, reducing manual hiring workflow by 80%.

Projects

- **Customer Behaviour & Shopping Trend Analytics**: Performed **EDA**, customer segmentation, and retention analysis using **Python, Pandas, NumPy, and SQL** to identify purchasing patterns and customer behavior drivers. Built an interactive **Power BI dashboard** tracking retention rate, revenue by segment, and product performance KPIs.
- **BlackCoffer Insights Visualization & Analytics**: Developed an interactive **Business Intelligence dashboard** to analyze global business trends across intensity, likelihood, relevance, and regional dimensions. Designed dynamic filters, pivot tables, charts, and visualizations to convert raw datasets into actionable business insights.

Certifications

- **SQL**: SQL Basics, Intermediate & Advanced – HackerRank
- **Power BI**: Power BI – Microsoft / Simplilearn
- **Full Stack Development & GenAI**: Full Stack Web Development with MERN Stack & GenAI – Udemy, 2025

Achievements & Publications

- Solved **250+ DSA problems** across GeeksforGeeks and LeetCode.
- The Role of Large Language Models (LLMs) in Healthcare Co-authored research publication examining the role of **Large Language Models** in transforming diagnosis and patient care.
